LOW-POWER JFET-INPUT OPERATIONAL AMPLIFIERS**  
D2392, NOVEMBER 1978—REVISED NOVEMBER 1988

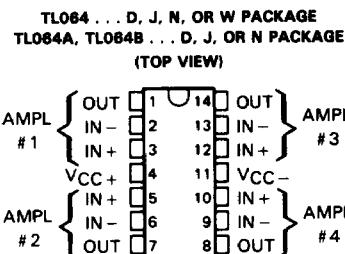

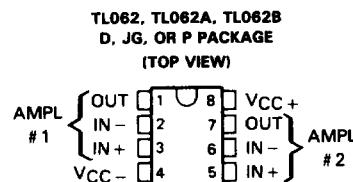

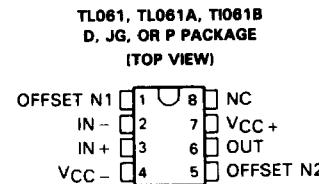

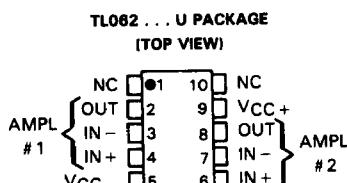

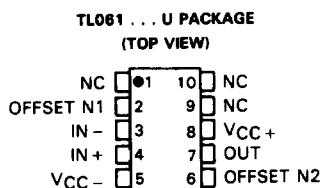

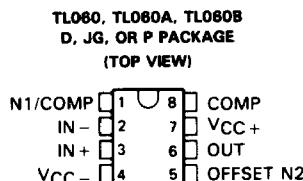

**20 DEVICES COVER MILITARY, INDUSTRIAL, AND  
COMMERCIAL TEMPERATURE RANGES**

- Very Low Power Consumption
- Typical Supply Current . . . 200  $\mu$ A (per Amplifier)
- Wide Common-Mode and Differential Voltage Ranges
- Low Input Bias and Offset Currents
- Common-Mode Input Voltage Range Includes VCC +
- Output Short-Circuit Protection
- High Input Impedance . . . JFET-Input Stage
- Internal Frequency Compensation (Except TL060)
- Latch-Up-Free Operation
- High Slew Rate . . . 3.5 V/ $\mu$ s Typ

**description**

The JFET-input operational amplifiers of the TL061 series are designed as low-power versions of the TL081 series amplifiers. They feature high input impedance, wide bandwidth, high slew rate, and low input offset and bias currents. The TL061 series features the same terminal assignments as the TL071 and TL081 series. Each of these JFET-input operational amplifiers incorporates well-matched, high-voltage JFET and bipolar transistors in a monolithic integrated circuit.

M-suffix devices are characterized for operation over the full military temperature range of  $-55^{\circ}\text{C}$  to  $125^{\circ}\text{C}$ . I-suffix devices are characterized for operation from  $-40^{\circ}\text{C}$  to  $85^{\circ}\text{C}$ , and C-suffix devices are characterized for operation from  $0^{\circ}\text{C}$  to  $70^{\circ}\text{C}$ .

**PRODUCTION DATA** documents contain information current as of publication date. Products conform to specifications for the terms of Texas Instruments standard warranty. Production processing does not necessarily include testing of all parameters.

Input voltage (see Notes 1 and 3)	$\pm 15$	$\pm 15$	$\pm 15$	V	
Voltage between power-control terminal and $V_{CC-}$	$\pm 0.5$	$\pm 0.5$	$\pm 0.5$	V	
Duration of output short circuit (see Note 4)	unlimited	unlimited	unlimited		
Continuous total dissipation	See Dissipation Rating Table				
Operating free-air temperature range	-55 to 125	-40 to 85	0 to 70	°C	
Storage temperature range	-65 to 150	-65 to 150	-65 to 150	°C	
Case temperature for 60 seconds	FK package	260		°C	
Lead temperature 1.6 mm (1/16 inch) from case for 60 seconds	J, LG, U or W package	300	300	°C	
Lead temperature 1.6 mm (1/16 inch) from case for 10 seconds	D, N or P package		260	260	°C
Lead temperature 1.6 mm (1/16 inch) from case for 10 seconds	L package	300		°C	

- NOTES: 1. All voltage values, except differential voltages, are with respect to the midpoint between  $V_{CC+}$  and  $V_{CC-}$ .  
 2. Differential voltages are at the noninverting input terminal with respect to the inverting input terminal.  
 3. The magnitude of the input voltage must never exceed the magnitude of the supply voltage or 15 V, whichever is less.  
 4. The output may be shorted to ground or to either supply. Temperature and/or supply voltages must be limited to ensure that the dissipation rating is not exceeded.
